

**Job Opening:** Cancer Data Services-Cancer Data Analyst

**Location:** Mission Health-SECU Cancer Center, Asheville, NC

**Job Summary:** Works closely with Cancer Program leadership in providing support for and ensuring department compliance and documentation of Cancer Program standards established by the American College of Surgeons Commission on Cancer and North Carolina Central Cancer Registry reporting guidelines. Monitors all types of malignant and non-malignant tumors diagnosed or treated at Mission Hospitals, Inc. as a critical element in cancer patient care. Manages and analyzes clinical cancer information for the purpose of education, research and outcomes measurement.

**Required Education:** Completion of an approved Cancer Registry Training Program offered through the American College of Surgeons, the Association of North Carolina Cancer Registrars, NCRA or other affiliated program. Successful completion of college level courses in anatomy and physiology, medical terminology, bio-statistics, epidemiology, management, and computer system applications required. Will consider combination of education and experience. Comparable experience and skills also considered.

**Preferred Education:** BS or AA. Degree in Cancer data Analysis , HIM, or RN. Formal training in Cancer data analysis, database records management, cancer program management, cancer registry operations. Knowledge of laboratory and pathology terminology, surgical instrumentation, and pharmacology desired.

**Required License:** Must be certified by the National Cancer Registrars Association as a Certified Tumor Registrar (CTR).

**Preferred License:** Clinical licensure or a credentialed healthcare professional (RN, RHIA, RHIT) or equivalent.
